Hi Rob,

Here are our preliminary treated and untreated sample results for dioxin TEQs (with non-detects treated as zero).

Note that we did not take a split sample of the untreated sediment at the laboratories, but rather took splits from the composite samples (12E-comp-V01AS and 12E-comp-V02AS) while on site.

Let me know if you have any questions.

Thanks,
Stephanie

Biogenesis.....

Sample ID
Description
Concentration (ng/kg, ppt)

12E-comp-V01AS
Untreated Sample
8,440

12E-comp-C-BIO
Treated Sample
15,200

Pear Technologies.....

12E-comp-V02AS
Untreated Sample
22,900

12E-comp-C-PT
Treated Sample
9,830

12E-comp-C-PT-DUP

Treated Sample
10,700
